

**FACTORY PROFILE ONLINE
ICS DATABASE**

Powered by:

**PROJECT ON TRANSPARENCY AND TRACEABILITY IN
PARTNERSHIP WITH ITC SUSTAINABILITY MAP**

JUNE 2021

SUMMARY

FOR FACTORIES AND SUPPLIERS.....2

Step ONE - Factory Profile2

- What is the ICS Factory Profile?2
- How to complete the Factory Profile?3

Step TWO - Factory ID to be a part of the bigger picture7

- What is the Factory ID?.....7

Step THREE - Manage your Privacy to go for public disclosure7

- Why join Sustainability Map?7
- Example7

Step FOUR – Invite your subcontractors and suppliers to build the network9

ANNEX 1 – EMAIL TO BE RECEIVED BY THE FACTORY AND THE SUPPLIER TO BE INVITED TO COMPLETE THE FACTORY PROFILE, TO ACCEPT THE TRANSPARENCY BY THE FACTORY ID AND TO GO FOR A PUBLIC PROFILE 12

ANNEX 2 – GUIDELINE TO COMPLETE THE FACTORY PROFILE 13

ANNEX 3 - FREQUENTLY ASKED QUESTIONS..... 28

- Is it the member’s responsibility to handle the network and invite the sub-contractors?28
- When supplier onboard its sub-contractors, will a link be automatically made in the ICS member’s network? Is the factory automatically referenced?28

Invitations to Factories:.....29

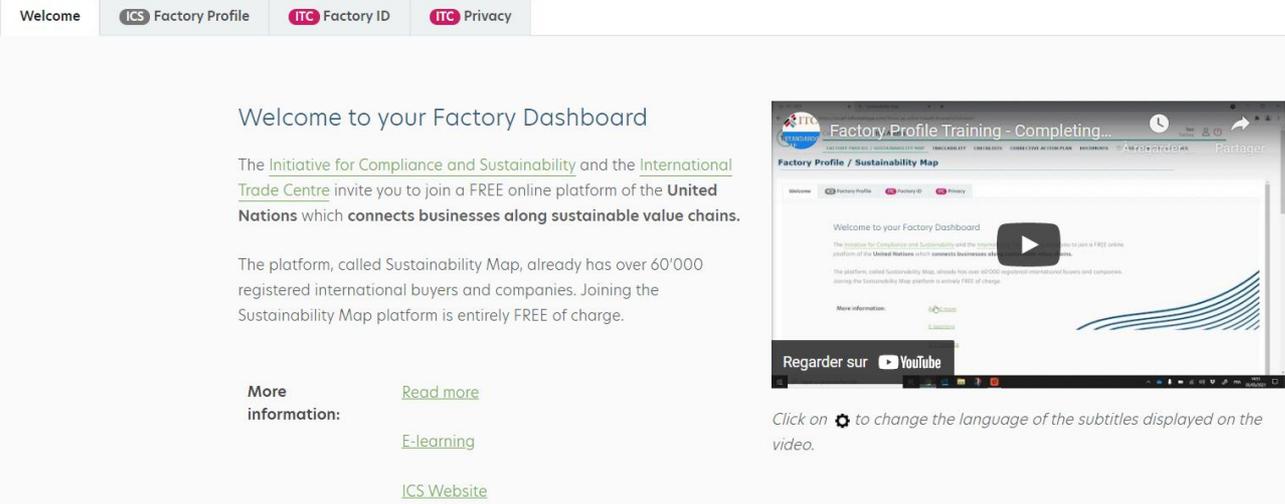

- Can members choose the contacts that should receive the invitations to fill in the FP? If audit companies are intermediaries, will they receive the notification as well?29
- Guidelines and documents are available on the ICS database account homepage with different steps and links. 29
- Is it possible to get the factory profile in Chinese so it is easier for the factories (do not know the English) to fill? 29
- Is the online FP feature linked to the FP sent before an audit is launched?29
- Is the online FP mutualized between ICS members linked to the factory?29
- Is it the audit company the one who sends the FP invitation to the factory to be audited? If yes, since when? .29
- Do we know when the factory filled in the online FP?29
- Are factories the only ones able to invite their sub-contractors to fill in their own FP? Or can members do it as well? 29
- Which contact emails will receive the FP invitation?30
- If no audit is planned, is the FP automatically sent?30
- Will it be possible to filter the map according to the products/sectors?30
- Can a member send a FP invitation to any factory (audited or not)?30
- Should I invite my factories to Sustainability Map if the factories are not going public?30

FOR FACTORIES AND SUPPLIERS

The ICS Database Dashboard for Factories and Suppliers allows factories and suppliers to update information on the factory's organization through the ICS database. This process replaces the Factory Profile that was shared previously via an Excel template.

This project is linked to the Transparency & Traceability project supported by the European Commission in which the [International Trade Centre \(ITC\)](#) developed the [Sustainability Map platform](#) – see [Annex 3](#).

Starting with the ICS audit process with the [Factory Profile \(Step 1\)](#), ICS and its Members joined this project to provide validated data summarized in the [Factory ID \(Step 2\)](#). Factories and suppliers are invited to publicly disclose limited information as summarized in the Factory ID through the Sustainability Map network by updating their [Privacy agreement \(Step 3\)](#).

Welcome to your Factory Dashboard

The Initiative for Compliance and Sustainability and the International Trade Centre invite you to join a FREE online platform of the United Nations which connects businesses along sustainable value chains.

The platform, called Sustainability Map, already has over 60'000 registered international buyers and companies. Joining the Sustainability Map platform is entirely FREE of charge.

More information: [Read more](#)
[E-learning](#)
[ICS Website](#)

Click on ⚙️ to change the language of the subtitles displayed on the video.

Step ONE - Factory Profile

Step ONE - Complete your Factory Profile

ICS Factory Profile

- This step is mandatory in the ICS process. Completed information will be communicated to the ICS members that identified your enterprise in their supply chains and later to the audit company, if an audit is being planned, to prepare for the auditor's visit.
- It is requested to answer the survey **in English only**.

- ***What is the ICS Factory Profile?***

The Factory Profile is part of the ICS Audit Process and is the first document to be shared between **the ICS Members, the factory and the supplier and the audit firm** to understand the organization of the factory and to later organize the audit according to the information contained within the Factory Profile.

The Factory Profile:

- can be requested by any ICS Member and is shared with other ICS Members that have/had/will have business relationships with the same factory,
- includes information such as identification information, the company management, the audits and the certifications, the factory area, the manpower, the products and the production processes and the environmental organization,
- must be completed by the facility prior to the audit with data needed by the audit company to prepare for the audit,
- will be validated during the audit opening meeting by the facility management with the auditor.

- ***How to complete the Factory Profile?***

The ICS Database Dashboard proposes the access to the suppliers and to the factories to complete their Factory Profile online.

The Factories and the Suppliers automatically receive their login details as soon as the ICS Members have invited them using the contact names and emails shared with the ICS Member, for at least the first tier of subcontracting.

The Factories and the Suppliers must accept emails from the domain 'noreply@dev.art-informatique.com'. The ICS database is available via <https://ics.art-informatique.com/>.

If factories and suppliers already had accounts to access the ICS database (through an online Corrective Action Plan (CAP) or through an online checklist), the same accounts can be used for the Factory Profile. In this case, login details will not be sent by the database.

For the suppliers or factories who have lost their ID to connect the database:

- **The login is always the email address.**
- **They must click on the login page:**

The email to be received is proposed in [Annex 1](#).

Each part should be answered. The guideline proposes in [Annex 2](#) the list of questions to be answered in the ICS Dashboard to complete the Factory Profile and specific guidance for the questions.

The users must check existing information on the ICS database, if the Factory Profile had been previously updated by the factory using the former ICS Excel template. If there are any changes, the ICS Database will save them and provide a comparative document to the ICS Members to highlight the updates.

Answered 1/83 questions.

FACTORY PROFILE

1. Photo of MAIN ENTRANCE of the Manufacturing Plant *

Choose file

No file chosen

2. Factory Name *

3. Factory Name (in local language) *

ENVIRONMENT

70. Does the facility generate wastewater from production processes?
Choose...

71. How many points of water sources are available on-site (number of boreholes, number of points of supply sources from municipality etc.)?

72. What sources of water are used at the facility (e.g. mains drinking water, mains process water, borehole abstraction, surface water abstraction etc.)?

73. What energy sources does the facility use (e.g. mains electricity, locally generated electricity, coal, oil, gas etc.)?

74. What are the main non-hazardous waste that the facility generates?

75. Does the facility generate hazardous waste? If yes, please indicate the types of hazardous waste.

76. Does the facility store, use or handle hazardous or potentially hazardous substances?

Answered 1/83 questions.

Step TWO - Factory ID to be a part of the bigger picture

Powered by:

The [Initiative for Compliance and Sustainability](#) and the [International Trade Centre](#) invite you to join a FREE online platform of the United Nations which connects businesses along sustainable value chains.

The platform, called [Sustainability Map](#), already has over 57'000 registered international buyers and companies. Joining the Sustainability Map platform is entirely FREE of charge.

Step TWO - Complete your Factory ID

ITC Factory ID

Your Factory ID will enable your business to gain visibility in the international supply chains, to promote the transparency and traceability in your industry and to improve working conditions within your company.

Gain visibility towards potential buyers looking for sustainable products

Create an online profile and QR code to market your business globally

Connect with sustainable enterprises

Thanks to the Factory ID, the factories benefit from a free and neutral platform to update their business sustainability credentials and to share information with international brands and other relevant organizations and institutions. By being part of [Sustainability Map](#), factories and suppliers will benefit from enhanced visibility and business opportunities.

• **What is the Factory ID?**

The **Factory ID** proposes the PUBLIC DISCLOSURE of limited information coming from the Factory Profile as validated through the ICS Database.

Only the following is shared:

- **Company Name**
- **Company Type**
- **Address**
- **Country**
- **City**
- **Contact information.**
- **Company Size**
- **Data source (i.e., where the information is coming from – in this case, ICS)**
- **ICS Report on audits performed:**
 - **Business license**
 - **Purchase department**
 - **Last audit type and date**
 - **Audit category**
- **Announce types**
- **Geolocation**
- **Production**
- **Network**

The **Factory ID** is prepared from information updated in the ICS Factory Profile, from additional information requested in the Factory ID (see screenshot below) and from information available in the ICS database **if ICS audits had already been performed** in the factory. Information coming from the ICS database regarding ICS audits cannot be updated by the factories and the suppliers but is validated by the ICS database according to the ICS process.

Certain information contained within the ICS Report, which had been validated on the ICS database, is communicated between the ICS and ITC databases through a direct API (IT link). Data are updated within 24 hours and provided on currently referenced factories working with ICS Members. The factories whose business relationships have not yet begun (with the reference statuses 'Prospect' or 'Not referenced yet') as well as those who no longer have any business relations with any ICS member ('Unreferenced' or 'Not referenced') are not published in Sustainability Map as part of the ICS Members' Networks but can be publicly found without any link to the ICS network.

The ratings resulting from the ICS audits are not communicated via the Factory ID. If required by any brand or stakeholder, the factories and the suppliers may communicate directly about their Corrective Action Plan (CAP) including the Summary of Content (SOC) and the rating, as provided by the ICS process. These documents are available in PDF on the ICS database.

The ICS Report publicly available through Sustainability Map communicates on the:

- Business license
- Purchase department
- Last ICS audit's type and date
- ICS audit's category
- ICS audits announce type.

The factories can still proceed to the completion of the Factory ID even if they don't complete all the info in the factory profile.

Additional information requested for the Factory ID is required through the ICS database:

Step THREE - Manage your Privacy to go for public disclosure

Step THREE - Manage your PRIVACY

ITC Privacy

After having reviewed and completed your Factory ID, go to the privacy tab to make your profile public on [Sustainability Map](#) to international brands and retailers.

- **Why join Sustainability Map?**

International brands want to buy sustainable products and check the validity of their partners' certification claims. Sustainability Map empowers MSMEs (Micro, Small and Medium Enterprises) committed to [sustainable production and processing](#) to increase their business potential.

Gain visibility towards potential buyers looking for sustainable products

Create an online profile and QR code to market your business globally

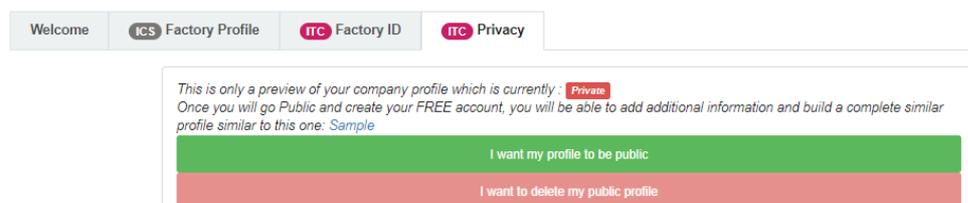

Easily backup the validity of your certifications and sustainability claims

Showcase the network of brands already sourcing your sustainable products

Once they have completed and verified the information in the online ICS Factory Profile, factories and suppliers are invited to commit to **Transparency and Traceability** requirements by accepting Public Disclosure of their Factory ID in Sustainability Map.

The factory is invited to define the Public status by clicking on **'I want my profile to be public'**:

- **Example**

Please find below the example of one Factory ID publicly as prepared in the ICS database in order to be shared on [Sustainability Map](#) as public profile of the factory i.e. its Factory ID.

The example shows a Factory ID that allows the factory to download **its QR code**, which in turn can be shared with any brand or stakeholder that wants to be informed about the project.

I want my profile to be public

I want to delete my public profile

Your profile can be viewed by others on the Network or can be accessed directly by sharing the following link or QR code :

[Download QR code](#)

Your public profile was last published on the Public Network on : June 12, 2021 2:19 AM.

Wujiang Jimengda Textile Co.,Ltd.
 HRX FASHION CO., LTD.
 Jiangsu ShengHong Technology Trading Co.,Ltd.
 Wenzhou Caifei Printing CO.,LTD

The **Network** builds the traceability links between the ICS Members’ subcontractors. All first tier’s subcontractors are organized by the ICS Members in the ICS Database in their private network and these subcontractors are invited through the Factory Profile to declare their own subcontractors to build towards complete traceability. The ICS Members can organize these links through the ICS database, but the links appear in the Public Network only between entities that accepted the Public Factory ID disclosure. The Network is built step by step with all actors’ commitment to provide **Transparency and Traceability** information.

ANNEX 1 – EMAIL TO BE RECEIVED BY THE FACTORY AND THE SUPPLIER TO BE INVITED TO COMPLETE THE FACTORY PROFILE, TO ACCEPT THE TRANSPARENCY BY THE FACTORY ID AND TO GO FOR A PUBLIC PROFILE

From: ICS Team noreply@ics.art-informatique.com

Object: Transparency and Traceability - Invitation to complete the ICS Factory Profile from ICS Member XXX

Dear Representative of Factory YYY,

The ICS Member is pleased to invite you to complete your Factory Profile and to accept to publish your Factory ID through the ICS Database.

We are proud to inform you that the [Initiative for Compliance and Sustainability](#) (ICS) and the [International Trade Centre](#) (ITC) have joined forces and technically developed specific linkages between their two databases.

You are invited to join a FREE online platform of the **United Nations** which **connects businesses along sustainable value chains called Sustainability Map**. The platform already has over 50'000 registered companies and international buyers. Joining the Sustainability Map platform is entirely FREE of charge.

- **Step one: Complete your Factory Profile**

This step is mandatory in the ICS process. Data completed will be communicated to the ICS Members that identified your enterprise in their supply chain. If an ICS audit is planned, the data will also be shared with the appointed audit company and the auditors to prepare their visit.

- **Step two: Complete your Factory ID**

Your Factory ID will enable your business to gain visibility in the international supply chains, empower you to improve working conditions within your company and promote the transparency and traceability in your industry.

- **Step three: Manage your privacy**

After having reviewed and completed your Factory ID under step 3, go to the privacy tab to make your profile public on [Sustainability Map](#) to international brands and retailers.

Thank you in advance for your collaboration.

All the best,

ICS Team

52. Is security handled internally or externally?

Externally ▼

FACTORY AREA

53. Is there any other business license present on the same location ? ▼

Choose...

54. If YES, please specify the business licence

BL-OTHER-NUMBER

55. Please specify the type of building.

Type of building	1 - Building leased by single factory. ▼
Workforce / Machineries	N/A ▼
Subcontracting in the same building	A part of the production of the facility filling in the Factory Profile is ▼

56. Comments

Comment of building

57. Density of workers on the site (number of workers per square meter - automatic calculation)

-0.00

58. Number of workers in accommodation provided by the employment site

Total workers in accommodation

For men

10

For women

10

20

59. What is the average number of sqm2 per person in the accommodation rooms (sqm2 of the room/number of occupied beds in the room)?

0.084

60. Does every worker have his/her own assigned bed in the accommodation?

No

61. Dormitory located within Factory area (Yes, No (describe) or N/A)

No

62. Please specify the address of the dormitory

101010

63. For family

Yes

PRODUCTS & PRODUCTION PROCESSES

64. Work shifts

	From	To	From
Work Shift 1	13:55 	13:11 	15:38
Work Shift 2	15:38 	15:44 	15:38
Work Shift 3 - please indicate here any additional shifts	15:38 	15:44 	15:38

65. Work at night

Yes

66. Peak season months

Peak season months

November		Remove
December		Remove
January		Remove

[Add](#)

67. Weekly rest days

- Monday
- Tuesday
- Wednesday
- Thursday
- Friday
- Saturday
- Sunday

68. Main Products

Product Typology	Production Standard Lead Time (in days)	Monthly production capacity (in pieces)	
Ladies garments (tops)	45	300000	Remove

69. For garment factories, please indicate the number of sewing lines

12

ENVIRONMENT

70. Does the facility generate wastewater from production processes?

Yes [v](#)

71. What wastewater/effluent streams are generated at the facility?

wastewater

72. Does the facility have its own Effluent Treatment Plant (ETP) or is it connected to a Common Effluent Treatment Plan (CETP)?

On-site ETP [v](#)

73. If the ETP/CETP is not located at the factory's address, could you please specify the ETP/CETP exact location?

ETP/CETP exact

74. What is the official ETP capacity designed by the constructor? (in m3/day)

525

75. What is the type of industrial treatment available on-site?

Primary treatments (physico-chemical) [v](#)

76. Where does the wastewater from the site discharge go to after treatment?

la bas

77. How many points of water sources are available on-site (number of boreholes, number of points of supply sources from municipality etc.)?

6

78. What sources of water are used at the facility (e.g. mains drinking water, mains process water, borehole abstraction, surface water abstraction etc.)?

borewell

79. What energy sources does the facility use (e.g. mains electricity, locally generated electricity, coal, oil, gas etc.)?

coal

80. What are the main non-hazardous waste that the facility generates?

Cotton, fabric cutting, packing waste

81. Does the facility generate hazardous waste? If yes, please indicate the types of hazardous waste.

Sludge, fuse tublights, wast oil

82. Does the facility store, use or handle hazardous or potentially hazardous substances?

Yes

Answered 80/83 questions.

Complete

Translations of the questions and the guideline are available on the ICS database.

ANNEX 3 - FREQUENTLY ASKED QUESTIONS

- **Is it the member's responsibility to handle the network and invite the sub-contractors?**
 - YES, the ICS Member must invite their subcontractors to fill the Factory Profile.
 - The subcontractors will declare their own subcontractors and each level is able to invite their linked subcontractors to complete the Factory Profile.

- **When supplier onboard its sub-contractors, will a link be automatically made in the ICS member's network? Is the factory automatically referenced?**
 - ICS could develop such feature, but this should be decided first by all ICS members. The risks are that the sub-contractor may not work for all ICS members. Right now, it has decided to manually reference it and link the factories in the network.

Invitations to Factories:

- ***Can members choose the contacts that should receive the invitations to fill in the FP? If audit companies are intermediaries, will they receive the notification as well?***
 - The factory and supplier contacts will receive the notification and invitation but NOT intermediaries. The notification explains the project and steps.
- ***Guidelines and documents are available on the ICS database account homepage with different steps and links.***
 - When the Factory Profile had already been filled in => the factory can update it (when the database could extract information from the correct Excel version).
 - It is now possible to extract data from a FP uploaded under the former Excel format (in the additional documents) => this will fill in the information directly on the ICS Database.
- ***Is it possible to get the factory profile in Chinese so it is easier for the factories (do not know the English) to fill?***
 - The guideline as the excel template enclosed provide the translation.
 - It is not at all a technical issue but a matter to be decided with all the brands analyzing the factory profile data because while proposing questions in local languages, answers will be provided in local languages and brands will receive data to analyze in local languages so they would have to be able to understand and use data.
- ***Is the online FP feature linked to the FP sent before an audit is launched?***
 - YES: the online FP replaces the Excel FP. Factories are invited to fill in the online FP directly before an audit. If the factory contacts already had a login/password => they will be able to access the online FP feature with the same account.
- ***Is the online FP mutualized between ICS members linked to the factory?***
 - YES: all FP online data is mutualized and shared between linked members.
- ***Is it the audit company the one who sends the FP invitation to the factory to be audited? If yes, since when?***
 - No, it is currently the member's task to send the FP invitation to the factories before an audit or independently of an audit.
- ***Do we know when the factory filled in the online FP?***
 - Yes.
 - ICS will develop pages for suppliers and agents that members will be able to link to factories in the ICS Database (not yet developed).
- ***Are factories the only ones able to invite their sub-contractors to fill in their own FP? Or can members do it as well?***
 - Members can do it as well from the list of sub-contractors in the extracted data from the FP.

- **Which contact emails will receive the FP invitation?**
 - It is very important to update and verify the contact details of factories in your network. Both factory and supplier contacts will receive the invitation.
- **If no audit is planned, is the FP automatically sent?**
 - Yes, the reminders are sent on a defined frequency whatever is the audit timing and ICS members can remind the factories to fill it in.
- **Will it be possible to filter the map according to the products/sectors?**
 - Not currently possible but will be developed in the future.
- **Can a member send a FP invitation to any factory (audited or not)?** Yes.
- **Should I invite my factories to Sustainability Map if the factories are not going public?**
 - The project is organized for the purpose of Transparency and Traceability.
 - The Sustainability Map platform offers a FREE and NEUTRAL platform to the factories to promote their commitments to sustainability.
 - It is organized to allow them to request the same commitment to their subcontractors – either if they themselves go public or not.
 - In addition, the Sustainability Map platform offers resources with [Sustainability Gateway](#), that promotes e-learning and resources on a global network, and [Standard Maps](#), that helps with the understanding on different standards' requirements.

• **Gambian entrepreneur empowers women through organic cotton production**

[Learn more](#) ➔

Elsie's Women Empowerment Farm is known as the first women-owned farm producing organic cotton in the Gambia, and as the name might suggest, women's economic empowerment is at the heart of this enterprise. Moreover, as a member of the Young Female Farmers Association, Elsie A. Williams works together with the association to boost women's role in agriculture.

'My vision was to revitalize cotton production in The Gambia,' says the farm owner. 'When we are successful with this, much more people will have jobs. I told myself to take the responsibility and mobilise other women, as I cannot do this alone.'
